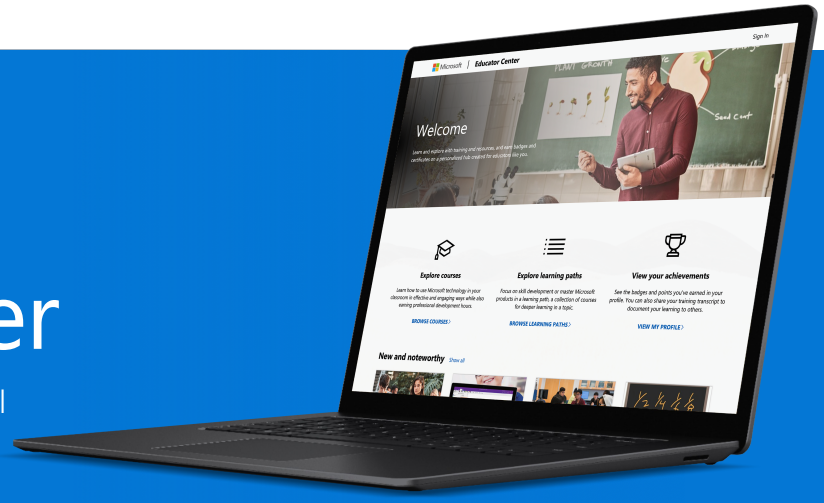
Microsoft

Microsoft Educator Center

Free, ready-to-use resources for professional learning. Built by educators, for educators.



The Microsoft Educator Center is built from the belief that when educators have the opportunity to learn and grow professionally, students thrive. Because every educator is on their own unique path with their students, we've developed a range of tools and resources that meet you where you are in your teaching practice.

Focus on what you want your students to achieve, pick your path, and go!

Courses: Build Your Skills

Learn how to put Microsoft technology to use in your classroom right away. Courses include click-through guides, screencasts, and tips and tricks to help you get up and running with new tools. Or, try something different with tools you already know and love!

Learning Paths: Transform Your Practice

Learning Paths guide you through a bundle of courses to deepen your understanding with more comprehensive skill development. With courses, you can also grow to mastery of best practices with Microsoft tools you already use.

Achievements: Show What You Know

Earn badges or points for every course and learning path you complete – online or in live trainings. Share your accomplishments in a training transcript that collects and stores what you've achieved over time!

The [Microsoft Educator Center]...has really strengthened our staff as a community. The teachers are so motivated that they're determined to carry on their training throughout the holidays to ensure their knowledge is the best it can be."

Sarah Morgan
Headteacher
Danesfield School

The tutorials available on the Microsoft Educator Center allow [teachers] to quickly fill gaps in knowledge and constantly develop their competencies.."

Daniel Betleja
IT teacher
Rzeszów First Secondary School

It changed how we teach reading and how we collect student data, and it sparked a flame that affected our whole school community."

Merlyne Graves
4th grade teacher
Garfield Preparatory Academy

From quick tips to innovative ideas to transformational skill building – the Microsoft Education Center has you covered.

New and Noteworthy

1. **Transform Learning with Microsoft Teams**
Get up and running with the tool that brings conversations, content, and apps together in one place. Teams streamlines workflow for administrators and allows teachers to save time while equipping their students with future-ready skills. aka.ms/LearningTeams

2. **Engage and Amplify with Flipgrid**
Teachers love Flipgrid, a video discussion platform that helps educators see and hear from every student in class and foster a fun and supportive social learning environment. This quick-start course will help you engage and amplify your learners, while earning you Flipgrid Certified Educator Level 1 Certification. aka.ms/EngageFlipgrid

3. **Teacher Training Packs for Live PD**
We've made it simple for you to deliver high-quality, collaborative trainings that pair what's happening in the classroom with Microsoft technology. Training is created by teachers, for teachers, and can be easily adapted to meet your team needs. aka.ms/TeacherTrainingPacks

Support at the Ready

Want to become a Certified Microsoft Innovative Educator (MIE)?
It's easy! Choose your own path to earn points and join a professional network of educators. Your MIE badge will appear on your training transcript, and opens the door to become a MIE Expert or MIE Trainer.

Looking for face-to-face training?
Check out our events calendar to find an upcoming on-demand or in-person training near you: aka.ms/edutrainevents
